JOVS Instructions for reviewers

Journal of Visualized Surgery (JOVS) aims to provide a service to authors and the research community by making as much research available as possible, provided it meets JOVS's high standards of research conduct and ethical procedure and is approved after peer review.

Open peer review
JOVS uses fully blind peer review, meaning that:
- reviewers are required to sign reviews with their name, position and institution
- any competing interests should be declared

Reviewers should contact the editorial office confidentially should the need arise in the case of, for example, a concern over a matter of publication ethics.

The role of reviewers
If we need your help with appraising a manuscript we will email you and ask you to accept or decline the invitation through our submission site.

We ask reviewers to help us to ensure that any studies published in JOVS were conducted properly, are scientifically credible, reported according to the appropriate guidelines (e.g. CONSORT for clinical trials) and ethical.

The editorial team is responsible for the final decision to accept or reject a manuscript, based on the reviewers’ comments.

We welcome feedback from our reviewers. If you have any comment you want to make, either on a manuscript you have reviewed and our decision on it or on our review process in general, we would be pleased to hear from you.

To become a JOVS reviewer
If you would like to volunteer, please register at: http://www.amepc.org/jovs/login?source=%2Fjovs%2Freviewer. This process will automatically add your name, contact details and expertise to our database of reviewers. Please let us know once you have registered.

Guidance for peer reviewers
All unpublished manuscripts are confidential documents. If we invite you to review an article and you choose to discuss the manuscript with a colleague, please remind them of the confidential nature of the paper and acknowledge their input in your review. Please also encourage colleagues to register as reviewers.

JOVS is very grateful to everyone who reviewed for the journal.
